Summary: I am a 5th semester student who knows the HTML, CSS, JavaScript, React js, Nexr js, Node js, Express js MongoDB. I am looking for chances to use and improve my web development skills. I love learning new things and keeping up with the latest trends and technologies. I want to gain more experience in web development.

PROJECTS

Anonymous Message App:

- Developed a secure anonymous messaging app using Next.js, Node.js, Express.js, MongoDB, and TypeScript.
- Integrated user authentication with NextAuth, enabling login and sign-up through email verification.
- Implemented a messaging system where users can send and receive anonymous messages with optional message acceptance controls.
- Utilized shadcn UI for a clean and responsive front-end interface, ensuring an optimal user experience across devices.
- Incorporated email verification upon sign-up, enhancing security and preventing unauthorized access.

To-Do App

- Developed an intuitive to-do list application using React.js for task management.
- Implemented features such as adding, editing, and deleting tasks with real-time updates to the task list.
- Leveraged React's state management to handle dynamic changes, ensuring a smooth and responsive user experience.

E-Commerce Store (Ongoing Project)

- Currently developing an e-commerce platform using Next.js to deliver fast and efficient performance through server-side rendering.
- Working on implementing key features like product browsing, shopping cart management, and user authentication.
- Using NextAuth for handling user login, sign-up, and account management.
- Designing a responsive and user-friendly interface with Tailwind CSS and shadcn UI.
